This collection of information is required by 37 CFR 1.5. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, Washington, DC 20231. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, Washington, DC 20231.

If you need assistance in completing the form, call 1-800-PTO-9199 (1-800-786-9199) and select option 2.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re application of: Anthony M. Chiu and Danielle A. Thomas
Serial No.: 10/025,601
Filed: December 18, 2001
Group Art Unit: 2872
Examiner: To Be Assigned
For: INTEGRATED OPTICAL UNIT FOR USE WITH
MINIATURE OPTICAL DISCS

MS Non-Fee Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to Commissioner for Patents, Alexandria, VA 22313-1450 on

NOVEMBER 12, 2003

(Date of Deposit)

SECOND INFORMATION DISCLOSURE STATEMENT

Enclosed is a European Search Report relating to European Patent Application No. 02258372.8, which corresponds to the subject Application. Also enclosed are copies of the six cited references and PTO Form No. PTO/SB/08A.

REMARKS

The European Search Report indicates that three of the six cited references are particularly relevant if taken alone. Each is discussed below.

The European Search Report refers to Publication No. WO 01/43126 and identifies FIGS. 7, 8, 18, and 26 therein as being relevant to Claims 1-3, 8-10, 12-17, and 19. These figures do not show first and second lenses as recited in Claims 1-3, and 8-10. FIGS. 7 and 8 refer to a silicon wafer rather than the glass wafer that is the subject of the method of Claims 12-17. However, the paragraph bridging pages 16 and 17 describes a method of using patterned lithography and etching techniques to define individual optical components in a glass wafer.

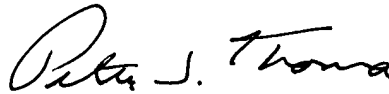

With respect to Claim 19, the first paragraph on page 9 of Publication No. WO 01/43126 describes polarization beam splitter surfaces 322 and 324, which act as mirrors. The mirror surfaces are “coated with a substantially reflective coating such as aluminum or reflective chrome coatings.” The last paragraph on page 15 describes forming reflective coatings from various materials “including single-layer or multi-layer coatings of metals or metal alloys such as aluminum, gold, silver, chromium, and the like or from single or multi-layer dielectric coatings.”

The European Search Report refers to Publication No. WO 00/03390 and its U.S. Patent counterpart, Patent No. 6,529,454 as being relevant to Claims 1-3, 8-10, and 19, identifying FIGS. 4, 6 and 7 thereof. None of these figures discloses first and second photodetectors as called for in Claims 1-3. However, FIG. 7 shows a photodetector IC 62 that is responsive to beams on three separate paths L3, L4, and L5. With respect to Claims 8-10 and 19, U.S. Patent No. 6,529,454 does not disclose a mirror “comprising an oxide, nitride, sulfide, or fluoride of a transition metal.” The beam splitter films 76, 77, and 78 of FIG. 7 are described as multi-layer dielectric films. See Col. 19, lines 1-2; Col. 20, lines 5-8.

Further, with respect to Claims 1-3, FIG. 7 of U.S. Patent No. 6,529,454 does not disclose “glass members for directing the laser beam from the second direction to the first lens.” The first lens 64 in FIG. 7 is in the direct initial path L1 of the laser without having been first reflected by a mirror to a second direction.

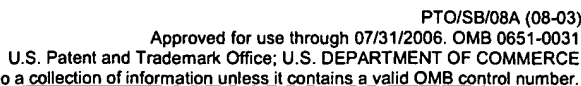

The filing of this Information Disclosure Statement is believed to occur before the first Office Action on the merits, pursuant to 37 CFR § 1.97(b)(3). Moreover, the filing of this Information Disclosure Statement is in compliance with 37 CFR § 1.97 (c)(1) and (e)(1) in that each item of information contained herein was cited in a communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing date of this Information Disclosure Statement.

Respectfully submitted,

Peter J. Thoma
